

ACCESSORIES

WELDED WIRE MESH

Rock material falling between the bolting pattern causes most rock fall injuries. Welded Wire Mesh provides a protective “screen” that reduces the number of rock fall injuries in the protected area.

Welded Wire Mesh provides additional protection in areas that incur roof or wall deterioration. The mesh is comprised of wires running horizontally and vertically that are welded together at the intersections. The mesh is then bolted tight to the roof or walls.

- Reinforces mine structures
- Edges are trimmed and flush-cut for added safety
- Easy handling
- Cut-to-size
- Hole aperture size and gauge thickness per customer specification
- Can be produced with galvanized coating for corrosion resistance

APPROVALS AND CERTIFICATES

an ISO 9001:2015
Quality Management System Certified Company.
